Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

1. **Team gathering**
   Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.
2. **Set the goal**
   Think about the problem you'll be focusing on solving in the brainstorming session.
3. **Learn how to use the facilitation tools**
   Use the Facilitation Superpowers to run a happy and productive session.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

How might we [your problem statement]?

Key rules of brainstorming

To run an smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP
You can use a sticky note and hit the spacebar to switch to sort to start drawing!

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

Methodology for crop protection

smart farming

Benefits

Effects in nature

Needs

TIP
Add customization tags to sticky notes to make it easier to find, browse, organize, and identify important ideas as clusters of related ideas or themes within your mural.

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Importance

Feasibility

Regardless of their importance, which ideas are more feasible than others? (Cost, time, effort, complexity, etc.)

- Analog detection system is designed to detect the disease at early stage and after a healing
- Automatic irrigation system
- Future origin an potential crop in-time
- The farmers can monitor the field condition from anywhere
- Possibility of automation
- Analysis the soil quality and detection is also necessary
- highly security is provided
- High reliability and long life time
- Agricultural drones are a game-changer in crop management and yield improvement in agriculture
- Measure volume of data received and provide information to farmers in real time

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

1. **Share the mural**
   Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.
2. **Export the mural**
   Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.
